

Steel Decking Panels

We now have galvanised steel panels available in 3 depths and all beam lengths. These panels are made from 1.2mm galvanised steel and simply drop into the step down beam. The hard wearing galvanised finish offers a clean, smooth finish enabling goods to be easily placed on the shelves and any spills wiped away. Other depths are available to order within 4 weeks.

For frame prices see page 45

Strong welded wire mesh

levels from £46.35

Long Span

Strong welded wire mesh, with three welded deck supports to each panel. Simply drops in place with deck supports nesting in the step down beam. These panels are excellent for storing individual components, cartons or irregular loads. These panels are fire retardant and are ideally suited for overhead sprinkler systems.

- ✓ Heavy duty welded mesh panels
- ✓ Three supports per panel
- ✓ Improve warehouse health & safety
- ✓ Fully electro-galvanised finish
- ✓ Ideal for sprinkler installations
