Superior quality cabinets in high-grade treated steel.

Features

Shell

- 1 One-piece welded construction in 7/10 mm thick sheet steel for the sides and back and 8/10 mm thick sheet steel for the base and top.
- 2 Selective drawer opening preventing the simultaneous opening of several drawers, preventing the unit from tilting.
- 3 Cabinets can be linked together or fixed against a wall. Lined front for silent operation.

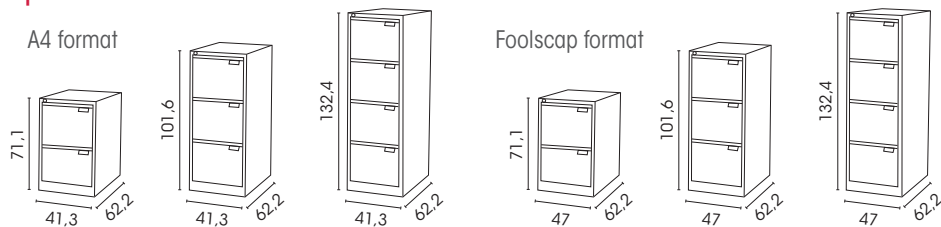

Drawers

2, 3 or 4 drawer cabinets with plain sides and back panels.

- 3 Grooved bottom section that fits dividers to facilitate filing. Drawers mounted on runners with progressive opening action and self-closing of the final centimetres. Runners with 4 ball bearings enclosed within nylon rollers guaranteeing silent operation and intensive use: over 80,000 opening/closing cycles. Drawers open to a depth of 100%.
- 3 Central locking securing all the drawers. Lock supplied with 2 keys. Master key available on request.
- 4 Recessed handles integrated into the drawer fronts with transparent label holder.
- 5 A4 format (33 cm centre distance) or foolscap format compatible with A4, folio and foolscap suspension files (33, 36.5 and 39 cm centre distance).
- 6 Internal drawer dimensions: H 25.5 x W 33/38.5 x D 55.5 cm.
