

Technical descriptions

DESKTOPS AND CONFERENCE TABLES

MDF VENEERED TOPS

Made of 30 mm thick MDF, faced on both sides with 0.6 mm thick wood veneer and edged with 1 mm rounded solid wood with 2 mm radius. The tops have a tapered and rounded edge. Waterbased coating and clear open-pore finishing. The top is equipped with a 80 mm grommet cable hole. The conference tabletops can be shaped to house recessed socket boxes with lid openable longitudinally in both directions equipped with cable hole. The door has the same finish veneer and the same colour as the top.

LEATHER-UPHOLSTERED CONFERENCE TABLES

Made of 28 mm thick MDF, faced on both sides with soft and delicate eco leather. The tops have a tapered and rounded edge. The central wood panels can be shaped to house recessed socket boxes with lid openable longitudinally in both directions equipped with cable hole. The door has the same finish veneer and the same colour as the central panel.

SUPPORTING AND CONNECTING PEDESTALS FOR DESKS AND LEATHER-WOOD CONFERENCE TABLES

In the version with wood or leather-upholstered tops, the pedestals comprise 2 pairs of 5 mm thick laser-cut steel sheet profiles. Coated with matt black epoxy powder. Each pair is fastened through metal spacers screwed to one another. The pedestals are fastened to the chrome-plated metal supports already installed on the legs. Where the metal pedestals rest on a side element, they're fastened through 32 x 35 mm h chrome-plated metal cylinders.

GLASS CERAMIC TOPS

Made of 10 mm thick tempered glass, chamfered at 45 ° with a 6mm thick ceramic sheet glued to it. The tops are glued to the matte black epoxy powder painted metal beams using cylindrical metal spacers.

GLASS DESKTOPS AND CONFERENCE TABLES

Made of 12 mm thick clear tempered glass. Rounded flush clear edge. The tops are fastened to the chrome-plated metal pedestals underneath through 32 x 35 mm h cylinder metal spacers. Optional 80 mm diameter chrome-plated grommet cable hole. The conference tables feature a chrome-plated grommet cable hole on the top.

SUPPORTING AND CONNECTING PEDESTALS FOR DESKS AND GLASS CONFERENCE TABLES

In the version with glass tops, the pedestals comprise 2 pairs of 5 mm thick laser-cut steel sheet profiles. The chrome-plated pedestals are connected with 43 x 35 mm solid wood spacers with the same colour as the leg. Where the metal pedestals rest on a side element, they're fastened through 32 x 35 mm h chrome-plated metal cylinders. The pedestals are fastened to the chrome-plated metal supports already installed on the legs.

LEGS FOR DESKS AND CONFERENCE TABLES

Solid wood rounded and smooth legs, with waterbased coating and clear open-pore finishing. 53 mm thick, 800 x 690 mm h tripod legs. The base features a 6 mm adjustable foot. The two rounded slots within the leg feature chrome-plated metal supports to fasten the pedestals.

SERVICE CABINETS AND CUPBOARDS

Shell made of 18 mm white melamine veneer, E1 certification, or with polyurethane lacquered finishing, various colours. The 18 mm front panels can be made of white melamine, lacquered or faced on both sides with 6 mm wood veneer and edged with 1 mm rounded solid wood with 2 mm radius. The shell modules with different sizes are installed on a 38 mm thick melamine base with the same finish as the shells. The service cabinets for installation underneath the desk feature cable trays to house electric and IT cables underneath the service cabinets' top. The top is supported by 170 mm h solid wood feet with the same finish as the desk legs. Equipped with 6 mm adjustable foot. The 12 mm top can be finished with white melamine polyurethane lacquered wood or wood veneer. The 12 mm thick top has a white melamine, polyurethane lacquer or wood or ceramic veneer finish of 6mm with 12 mm melamine support.

MODESTY PANEL

Made of 18 mm chipboard panel, veneered as the desktop, and fastened to the pedestals through black metal connection brackets.

Eletrificazione · Electrification · Electrificación
Elektrisierung · Elektrificatie · Electrificación

I cavi sono alloggiati in un'ampia vaschetta e possono essere bloccati con fascette che si inseriscono in apposite fessure.

The cables are collected in a wide tray and can be locked with clamps inserted in special slots.

Les câbles sont logés dans un grand bac et peuvent être bloqués avec des colliers qui s'insèrent dans des fentes prévues à cet effet.

Die Kabel sind in einem großen Behälter enthalten und können durch Klemmen, durch vorgesehene Schlitz, blockiert werden.

De kabels worden ondergebracht in een ruime mand en kunnen geblokkeerd worden met behulp van klemmen die in de desbetreffende openingen worden gestoken.

Los cables están alojados en una amplia bandeja y pueden bloquearse con bridas, que se introducen en unas ranuras.

Lo spazio permette il passaggio dei cavi ad anta chiusa. La pressione esercitata dalle spazzole tiene in posizione i cavi.

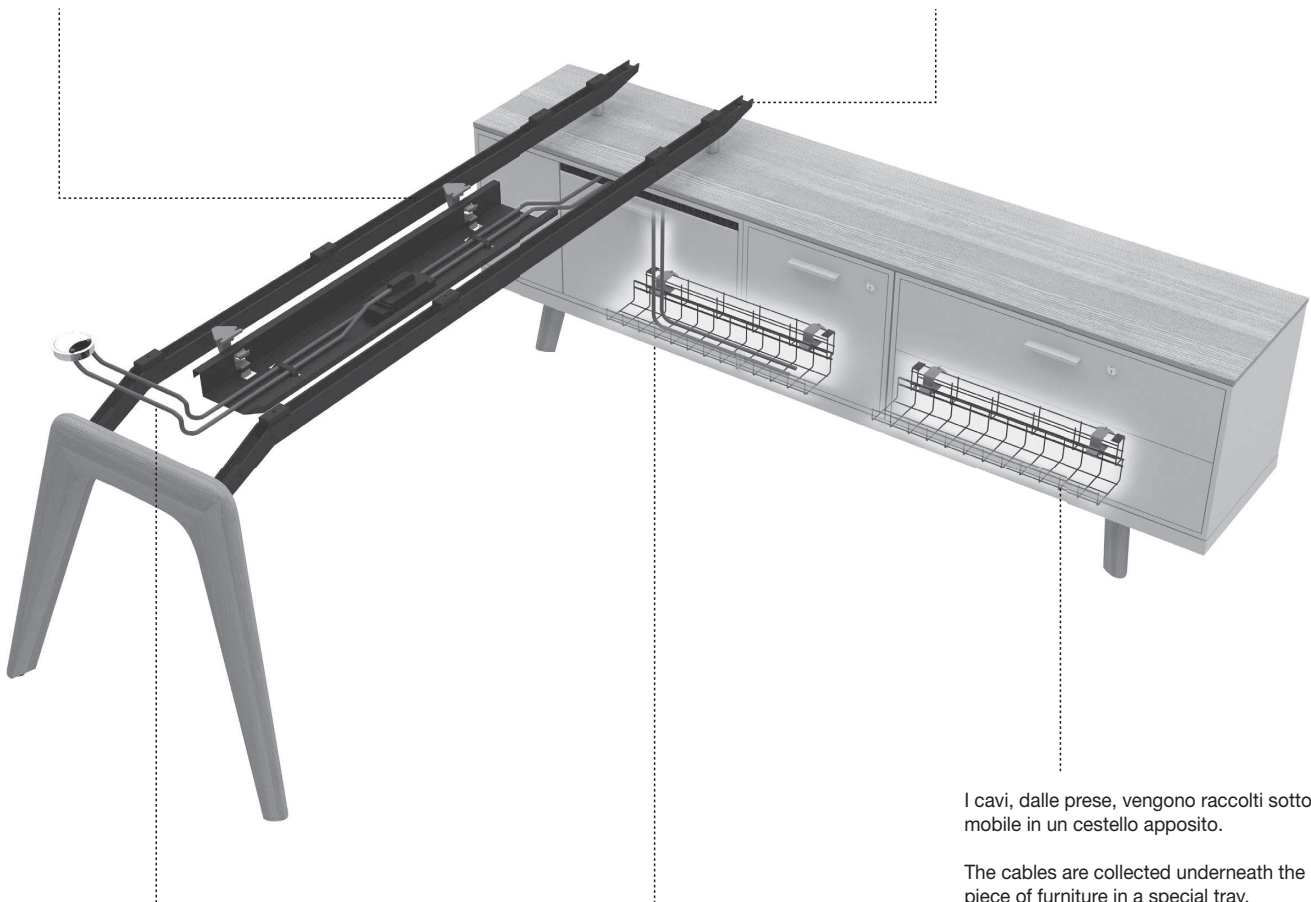

The recess allows the passage of cables even with the door closed. The pressure exerted by the brushes maintains the cables in position.

L'espace permet le passage des câbles quand la porte est fermée. La pression exercée par les brosses maintient les câbles à leur emplacement.

Der ausreichende Raum ermöglicht die Kabeldurchführung bei geschlossener Tür. Der von den Bürsten ausgeübte Druck hält die Kabel in Position.

Het is mogelijk om de kabels erdoor te steken met een gesloten deur. De druk die door de borstels wordt uitgevoerd houdt de kabels op hun plaats.

El espacio permite el paso de los cables con la puerta cerrada. La presión ejercida por los cepillos mantiene los cables en su posición.

I cavi sono resi disponibili su piano attraverso appositi fori con sistema passacavi.

Cables are available on the top through cable grommet holes.

Les câbles arrivent sur le plateau à travers des trous avec un système passe-câbles.

Die Kabel stehen durch das Kabeldurchlasssystem auf der Tischplatte zur Verfügung.

De kabels worden beschikbaar gemaakt op het blad door speciale kabeldoorvoeropeningen.

Los cables resultan disponibles en el sobre gracias a unos orificios con sistema pasacables.

I cavi passano attraverso il mobile transitando da appositi passacavi.

Cables pass through the recesses within the piece of furniture.

Les câbles transitent dans des espaces situés à l'intérieur du meuble.

Die Kabel werden innerhalb des Schrankes geführt.

De kabels worden door ruimten aan de binnenkant van het meubel gestoken.

Los cables se extienden a lo largo de los espacios obtenidos en el interior del mueble.

I cavi, dalle prese, vengono raccolti sotto il mobile in un cestello apposito.

The cables are collected underneath the piece of furniture in a special tray.

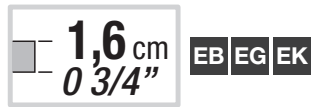

À partir des prises, les câbles sont rassemblés sous le meuble dans un panier prévu pour cela.

Die Kabel werden von den Steckdosen unter dem Möbel in einem geeigneten Korb positioniert.

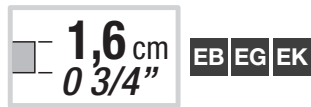

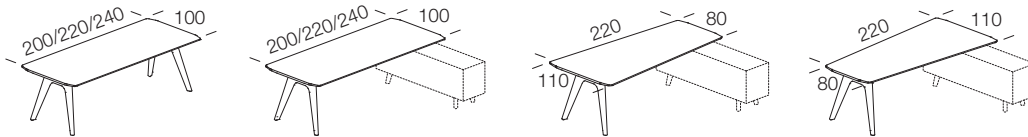

De kabels worden vanaf de stopcontacten onder het meubel in een speciale mand verzameld.

Los cables de las tomas de corriente se recogen debajo del mueble en una cesta.
